EDUCATION

IIMT Engineering College, Meerut

Hapur, Uttar Pradesh

Bachelor of Technology in Computer Science and Engineering

2023 – 2027

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems
- Strong foundation in core computer science principles with focus on software development

EXPERIENCE

Web Developer

January 2025 – January 2026

Tyrano Softwares

Remote

- Engineered and maintained company's official web presence across **tyranosoftwares.com** and **tyrano.in** using React.js, Tailwind CSS, and Bootstrap, delivering a cohesive and professional brand experience
- Architected reusable React component libraries that streamlined UI development workflows and ensured visual consistency across multiple production deployments
- Translated Figma/design mockups into pixel-perfect, fully responsive interfaces with cross-browser compatibility covering desktop, tablet, and mobile viewports
- Partnered with backend developers and stakeholders to convert business requirements into scalable frontend solutions, consistently delivering within project timelines
- Identified and resolved performance bottlenecks through code refactoring, lazy loading, and frontend optimization techniques, enhancing overall application speed and efficiency

PROJECTS

FinTrack – Finance Dashboard | *GitHub · Live*

2026

- Developed interactive finance dashboard with balance trends, spending donut charts, transactions table (search/filter/sort), and monthly insights
- Implemented role-based access (Admin: CRUD operations; Viewer: read-only) with Context API state management, React Router v6 navigation, and role switcher
- Built responsive data visualizations using Recharts (line/bar/donut charts), empty states, and mock data persistence simulation
- Engineered production-ready structure with modular components (Sidebar, Navbar, Dashboard, Transactions, Insights) and optimized performance

Fashion Store – E-Commerce Frontend | *GitHub · Live*

Feb 2026

- Built modern e-commerce frontend featuring live API product data, real-time search, category filtering, cart, wishlist, and checkout flow
- Implemented dark mode toggle via ThemeContext, toast notifications, skeleton loading, mobile-first responsive design with sticky navbar and smooth animations
- Engineered production-ready architecture using StoreContext for state management, optimized API handling to eliminate duplicates, and smart SALE tag system
- Delivered v2.0.0 upgrade with major UI overhaul (96.6% JavaScript), clean component structure (Navbar, ProductDetail, Filters, Cart)

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), C, C++, Python, SQL

Frontend Technologies: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap, Responsive Design, DOM Manipulation

Database: MySQL

Developer Tools: Git, GitHub, VS Code, Chrome DevTools, npm.

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, Version Control, Problem Solving

Soft Skills: Team Collaboration, Quick Learner, Adaptable, Strong Communication, Time Management

ACHIEVEMENTS & ACTIVITIES

- Solved 180+ coding problems on **GitHub (Blind-75 LeetCode)** and LeetCode, strengthening problem-solving and DSA skills
- Maintained a **GitHub (DSA Repository)** covering Arrays, Trees, Graphs, and Dynamic Programming in Java and Python
- Completed Hacktoberfest 2025 with open-source contributions and **GitHub Profile** activity across multiple repositories
- Built and deployed 2 production-ready React projects, including FinTrack and Fashion Store, with live demos
